In a High Security Detention Centre in the remote Amazon jungle, a selected bunch of beautiful young women are kept naked and in chains, waiting… They are all foreigners with no relatives in the country. No one knows they are there. They just disappeared one day…
The girls are forced to work in a rather special brothel, hired out by the day and even sold if a rich client takes a special fancy to them.
The only limits in Torture Brothel are provided by the client’s imagination. He is King and is free to do whatever he likes with his whore. If he goes too far and the girl dies or is disabled and cannot do her job, the client pays the bill and no questions are asked.

Three selected girls, blonde, brunette and redhead, wait in the reception room. They are in chains. It’s early in the morning and no one has come to get them yet. Suddenly, a door opens and the girls turn their head in terror to the door...
